- First Person Media Player (FPMP)
- Digital Concert Space

Providing an arena for
independent electronica music makers.

in Sound™

A new trend

Music is increasingly inaccessible due to subscription models, pay to play, and big social. Listeners & music makers are being priced out.

That isn't okay. Tranceplayer™ is here to level the playing field and return easy access to digital music.

We can do that for each other.

- Reza Akhavan / Exist in Sound

Tranceplayer™

+ First Person Media Player (FPMP)
+ Digital Concert Space (DCS)
+ DCS Powered by Exist API
+ Built in Live Stream Capability

Developed by Leka Studios (Sweden)

DJ & music makers - have your own Tranceplayer™

Live Stream Capability

+ Point Tranceplayer™ API to your streaming URL
+ Not stream yet? No problem.

Traditional MP3:

+ Provide the Exist Team a 320kbps MP3 file.
+ DJ Mix set or live performance? Up to you.
+ Artists music is scheduled in Tranceplayer™.
+ End users experience it like it is live.

Tranceplayer: Example Workflow

Step 1 Decide on a Timeframe

A. Pick what works for you.
B. I.E. 2 week/month rotations.
C. Your team provides Exist with your set.
D. We promote like we would any live gig.
E. The API is updated to live at showtime.

Step 2 The Tranceplayer™

A. Provide friends with copies of Tranceplayer™.
B. Install and await for the day/time of show.
C. No FPMP? Tune into the Exist Twitch channel.
D. Friends with Tranceplayer™ can enjoy in player.

Step 3 Show Time

A. Friends hop in during the time the show is active and enjoy.
B. Great addition to your existing livestreams as well.
